

23-25 September 2008
Stoneleigh Park, Near Coventry, UK

Issue: August 2008

NEWSLINE

Is pipebursting all it's cracked up to be?

Is drilling really boring?

Which liners deserve the Blue Riband?

Here's your chance to find out - and you won't get another for two years!

A great deal has happened in the Trenchless Technology industry recently - new products, new techniques, new companies and, for a change, no shortage of demand. How can you tell if these bright ideas really work? Where can you see them in action? What's the best way to meet other people from all sides of the industry - manufacturers, suppliers, contractors, consultant, clients?

The answer is NO-DIG LIVE 2008, on 23-25 September at Stoneleigh Park, near Coventry.

This is a unique opportunity to see not only indoor exhibits but also outside demonstrations where the gloss and polish of the showroom is replaced by mud and dirt. It's educational and inspirational, and puts meat on the bones of product literature and static displays. If you really want to see how things work, NO-DIG LIVE is the place to be.

Nearly 100 exhibitors from the UK, mainland Europe and beyond will be there to show you what their products and systems can do, and to discuss your specific requirements. There is no better venue for matching solutions to problems, and for seeing the very latest developments. One of these may just be the answer to your prayers!

NO-DIG LIVE 2008 is not a 'jolly' or an excuse to get out of the office, although we hope you'll find it enjoyable as well as informative. It is a rare gathering of all that is best in Trenchless Technology, together with industry gurus who are more than willing to share their expertise.

Be part of the action - look and learn at NO-DIG LIVE 2008.

Register now

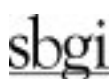

Entry to NO-DIG LIVE 2008 is free to all trade visitors. Register on-line at www.nodiglive.co.uk. All pre-registered visitors will receive an entry pass in advance. You can also register on arrival at the show, but sign up in advance to claim your FREE gift (see inside for details) and avoid queuing on the day!

Exhibitor round up

To find out more about featured exhibitors and all other companies participating, visit www.nodiglive.co.uk

Tunnel Engineering Services

NEW PRODUCTS TES (UK) Ltd will be exhibiting its hydraulically driven auger bore machine, specifically designed to operate out of small shafts and work in conjunction with the Akkerman guided boring machine to provide the accuracy that the utilities industry demands. As the official distributor of Akkerman Inc. USA equipment, TES will also be displaying the newly developed Akkerman powered cutterhead. This range utilises an independent cutter face and auger drive motors for lower jacking forces and a faster advance rate. Visit us on Outdoor Stand 3.

Ditch Witch UK

NEW PRODUCTS Visit Ditch Witch UK's outdoor stand 28 to see the new revolutionary Jet-Trac 30/20 & Jet-Trac 9/22. The JT30/20 is powered by a 156hp Cummins Engine that omits a mere 80 dBA noise emissions and generates over 13 tonnes Pullback & 4,000 ft/lbs Rotational Torque. The JT9/22 combines the simplicity and easy operation of smaller drills with advanced features that other drills of similar size, can only dream. The JT9/22 is the shortest drill in its class and it is powered by a 54hp Deutz engine and generates over 4 tonnes Pullback, 1,100 ft/lbs Rotational Torque and runs a 9 or 13 gpm Mud Pump. Also being exhibited will be the field-proven JT40/20 now with Rack & Pinion Thrust Drive, the new 85 Tonne Ditch Witch Pipe Bursting System, the FX60 Vacuum Excavation System & the range of Pierce Airrow II Impact Moles.

Steve Vick

NEW PRODUCTS Steve Vick International will be revealing an entirely new annular sealant for dead inserted gas services. FULLSEAL™ has been developed to seal the gap between a new inserted PE pipe and the old steel service. It is an inert, environmentally friendly alternative to using anaerobic sealants or polyurethane resin foams. A natural product, FULLSEAL™ contains no harmful chemicals and requires neither mixing nor other preparation before use, making it safe and extremely easy to use.

Visit stand 310.

Naylor Drainage

Naylor Drainage Ltd, manufacturer of the Denlok jacking pipe, has been crowned Best SME at the Institution of Mechanical Engineers' prestigious Manufacturing Excellence Awards. The title is awarded to the company which demonstrates 'all-round excellence across a range of the factors which make for competitiveness'. In giving Naylor the award, the judges commented on the company's 'strategic direction, investment in process and product, plus boundless enthusiasm'. Visit Naylor at NO-DIG LIVE on stand 314

UK Pipelines

NEW PRODUCTS In a bid to boost skill levels in the drainage and pipeline industry, UK Pipelines is opening a dedicated training centre at its headquarters in Sheffield. The online drainage and pipeline retailer is working with the EU Skills Council and others in the sector, to establish a recognised standard for industry training. From mid-August, UK Pipelines will be aligning training courses at its new centre with the EU Skills Council's new Competent Drainage Operative National Register. Training will be available in the various key roles that exist within the industry, to demonstrate competence and allow individuals to work effectively in terms of health and safety and operational techniques. Visit Stand 208 for full details.

Waterflow

Waterflow specialises in the maintenance, inspection, repair and rehabilitation of wastewater networks. Services include sewer inspection and 24hr maintenance, specialist sewer cleaning, civil engineering, remote CCTV inspection of laterals from the main sewer, and the latest renovation technologies including the WRc Approved UV-Cure lining system. See these innovations at outside Stand 10.

IST

This company is a manufacturer and supplier offering the greatest selection of pipe/sewer rehabilitation products in the industry. IST developed versatile liner systems and the whole range of technical rehabilitation-equipment for cured-in-place liner as well as partial liner. Additionally we offer a wide range of high-quality products including an extremely resistant spray coating system for the rehabilitation of manholes, sewer treatment plants and separators. Visit Stand 110.

Trelleborg epros

NEW PRODUCTS

Trelleborg epros will have a significant presence at No-Dig Live 2008. In addition to the company's wide range of mainline, lateral lining, pipeline repair products and accessories, Trelleborg epros will be introducing the latest expansion of its lateral connection sealing systems to the UK market - epros® DrainLCR-B and the recently launched epros® SprayCoating system, EproCoat SB. Visit stand 302 for full information.

Plant & Site Services Ltd

NEW PRODUCTS

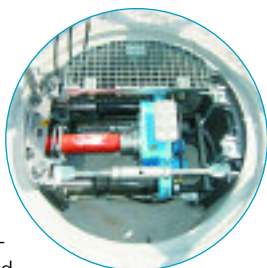

PSS on outside stand 6 will have a range of innovative PE pipe welding and handling equipment on display including Fusion and McElroy products. PSS who are market leaders in the Butt Fusion and Electrofusion hire industry will have the Extranet system to show, this enables customers to view their own 'live' hire information on line amongst many other benefits.

TT-UK

TT-UK will be showing a laser guided, auger boring system at No-Dig Live. The Grundobore 200S is designed for steerable and non-steerable installations of house connections, laterals and other pipes ranging in diameter from 100 - 150mm. The 200S unit is well suited for tight working conditions including manholes.

For larger pipe size installations 150 - 200mm the Grundobore 400S is also available. For further information please visit outside stand No 1 or visit our website at www.tt-uk.com

Mini-Cam

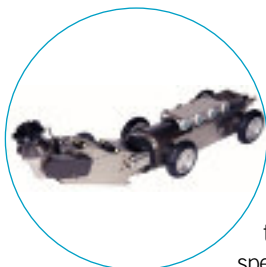

Manufactures of a range of push cameras from basic look-see to the latest in Digital Technology, Mini-Cam are also the UK dealer and service centre for iPEK who manufacture ROVER® and SUPERVISION® Crawler Inspection Systems which can be supplied with the latest pipe surveying software by Digisewer®. Mini-Cam also offers a Custom Vehicle Service which allows bespoke vehicle fit outs complete with all CCTV requirements. New products on display will include the SAT 140 system which allows junction inspections from within the main sewer. Visit Stand 402.

IMS Robotics

A visit to the IMS Robotics stand 154 will pay dividends if you are looking for robotic solutions for sewer rehabilitation.

This medium sized company has worked in the area of modern environment technology for more than 15 years and specialises in the design, engineering and manufacture of equipment for this area of trenchless technology. These very innovative products are widely patented.

Vermeer

NEW PRODUCTS

After setting the bench mark in domestic directional drilling for the past 15 years, Vermeer manufacturing are now stepping up a gear with the introduction of the new range of maxi drills. With pull back forces of 500,000 to 1,000,000 pounds, the new line up is built to take on your biggest projects. Visit outdoor Stand 8.

Sewercenter

Sewercenter will be demonstrating a range of the latest drain inspection technology including the IBAK Panoramio SI manhole scanner which can scan an entire manhole in a matter of seconds. There will also be the opportunity for customers to talk to our technical experts and to pick up information on the latest products on the market. See us on outside stand 29.

Hermes Technologie

In a scheme to relieve flooding in Greater London, Thames Water examined the options to radically alter the operational role of a 25m deep Victorian sewer maintenance shaft. The Hermes M-Coating process was selected for the project, in conjunction with Ergelit -KS1. Pre-requisites were high corrosion resistance, high abrasion resistance, optimum mechanical cleaning without operatives entering the shaft, and optimum mechanical coating of walls without operatives entering shaft. Visit Outside stand 41 for full information. ▶

Exhibition opening times:

Tuesday 23 Sept 10.00 - 18.00
Wednesday 24 Sept 10.00 - 18.00
Thursday 25 Sept 10.00 - 16.00

Pre-register for the show & claim your FREE gift!

Every visitor who pre-registers and attends NO-DIG LIVE 2008 will receive a FREE USB stick on arrival at the show.

Ferro Monk

Ferro Monk is a leading water and waste water rehabilitation specialist providing solutions to many industry sectors. The UK's first officially approved contractor to commercially use environmentally friendly Ultracoat, it also offers its own patented Ferrocement solution and a number of remote systems, including CIPP Lining and isolated patch repairs. Visit stand 216.

Adien Ltd

Visit Adien's stand No 160 to obtain information on their complete solution to utility detection and mapping. Four levels of service are offered, from Level 1 to gather the statutory information to Level 4 being the complete identification and verification of buried utilities by vacuum excavation. Offering a first class consultancy service, Adien's project managers work closely with clients to ensure that there is full understanding of project requirements. The eight man drawing office ensures that all our drawings are processed and tailored to client's requirements. Formed in 1997, Adien had enjoyed rapid growth, opening offices in South Yorkshire, Hampshire and Scotland.

Free Breakfast Briefing

*Transfer of Private Sewers to the UK Water Companies
Wednesday 24 September 8.00am - 10.00am*

Come to Stoneleigh early on Wednesday 24 September and join the debate on 'The Transfer of Private Sewers to the UK Water Companies'. This session aims to provide a balanced insight into the concerns, problems and practicalities surrounding the issues facing water companies, regulators, contractors and the public.

Sign up for this FREE session when you register for the show. Pre-registration is strongly advised as space is limited.

Easy to get to & easy to park

Stoneleigh Park is quite straightforward to reach by car, train and by air via Birmingham International and Coventry airports. Log onto the show website www.nodiglive.co.uk and select 'Travel Centre' for full directions.

Important: The postcode for SATNAV users is CV8 2LZ.

Exhibition opening times:

Tuesday 23 September 10.00 - 18.00
Wednesday 24 September 10.00 - 18.00
Thursday 25 September 10.00 - 16.00

Last chance to book your space

With just a few weeks to go, you may still have time to book one of the last remaining stands at the show. Call the sales team now to check out the remaining stand availability on **0845 094 8066**.

Already a great line up of exhibitors are preparing to display the latest equipment and products at this specialised event. Check out which of your competitors will be taking part on the list below!
